Solving Systems Algebraically

A solution of a system of two linear equations consists of the values of x and y that make both of the equations true — at the same time. Graphically, the solution is the point where the two lines intersect. The two most frequently used methods for solving systems of linear equations are elimination and [...]

Solving Two Linear Equations Algebraically - dummies

There are essentially three different methods to solve systems of equations algebraically. They are listed and described briefly below. The Graphing Method: When there is one variable solved in both equations, it is easy to use a graphing calculator.In this case, the calculator can be used to graph both equations.
