GEOLOGY - crossword answers, clues, definition, synonyms ...

You can't, directly. The point of generics is to provide compile-time type safety, where you know the type you're interested in at compile-time, and can work with instances of that type. In your case, you only know the Type so you can't get any compile-time checks that any objects you have are instances of that type.. You'll need to call the method via reflection - something like this:
