390 Part VI Learning About the World d) The confidence interval that was calculated in Exercise 10 won't help us to estimate the sample size. That interval was for 90% confidence. Now we want 95% confidence. A quick estimate with a critical value of $z* = 2$ (from the 68-95-99.7 rule) gives us a sample size of 100, which will probably work fine.
