A knight's tour is a sequence of moves of a knight on a chessboard such that the knight visits every square only once. If the knight ends on a square that is one knight's move from the beginning square (so that it could tour the board again immediately, following the same path), the tour is closed, otherwise it is open.. The knight's tour problem is the mathematical problem of finding a knight ...

Initializing your objects, arrays, and containers is much easier in C++11 than it used to be in C++03. Danny Kalev explains how to use the new brace-initialization notation, class member initializers, and initialization lists to write better and shorter code, without compromising code safety or efficiency.
