The strategy used for solving these solution stoichiometry problems is to set up the problem so that the units cancel. When the volume of a solution is multiplied by the molarity of a solution the resulting units are moles. A balanced equation allows us to convert from moles of a known substance to moles of an unknown.

Solutions for the Stoichiometry Practice Worksheet: When doing stoichiometry problems, people are frequently worried by statements such as "if you have an excess of (compound X)". This statement shouldn't worry you… what it really means is that this isn't a limiting reagent problem, so you can totally ignore whatever reagent you have an excess of.
