A business service provider (BSP) is one of several categories of service provider in the business world. As opposed to an application service provider which provides application components over a computer network, the services provided by a BSP are more in the area of infrastructure: mail delivery, building security, finance, administration, and human resources.

Business service provider - Wikipedia

The textbook Algorithms, 4th Edition by Robert Sedgewick and Kevin Wayne surveys the most important algorithms and data structures in use today. The broad perspective taken makes it an appropriate introduction to the field.
