The CookieStore saves the session hash directly in a cookie on the client-side. The server retrieves

the session hash from the cookie and eliminates the need for a session ID. That will greatly increase the speed of the application, but it is a controversial storage option and you have to think about the security implications and storage limitations of it:

Securing Rails Applications — Ruby on Rails Guides
Oracle Database New Features Guide is addressed to those of you familiar with previous releases of Oracle Database and who would like to become familiar with features, options, and enhancements that are new in this release of the database.

Oracle Database 12c Release 1 (12.1.0.1) New Features
User-Defined Functions (UDFs) are an essential part of the database developers' armoury. They are extraordinarily versatile, but just because you can even use scalar UDFs in WHERE clauses, computed columns and check constraints doesn't mean that you should. Multi-statement UDFs come at a cost and it is good to understand all the restrictions and potential drawbacks.

SQL Server User-Defined Functions - Simple Talk
Retake Policy. Candidates must wait 14 days before retaking a failed proctored exam. (Registration will be allowed on the 14th day) Candidates may retake an online non-proctored exam at any time.
