Systems theory. Modern management is characterized by two approaches, the systems and the contingency approach. The systems approach views the organization as a total system comprised of interacting subsystems, all of which are in complex interaction with the relevant external environment (Lerman & Turner, 1992).

Material requirements planning (MRP) is a production planning, scheduling, and inventory control

system used to manage manufacturing processes. Most MRP systems are software-based, but it is possible to conduct MRP by hand as well.. An MRP system is intended to simultaneously meet three objectives: Ensure materials are available for production and products are available for delivery to customers.

Material requirements planning - Wikipedia

For businesses wanting to survive in ever more competitive markets, where technological solutions are changing faster than many businesses can keep pace with, it's difficult to take advantage of the benefits of automating manual processes, because by the time a new software solution has been committed too, the technology has moved on.
