SOLUTIONS TO SELECTED PROBLEMS FROM RUDIN 3 $X* := \cup\infty$ n=1X1 n yields a countable dense subset. Therefore, X is sep-arable (see pbm. #22) which shows that it has a countable base (see pbm #23). Gee, that was fun. I see it takes a lot longer to type these problems up in LATEXrather than by hand, but I think it'll be a useful tool for me to learn anyway.

tions of Exercises 23–26, Chapter 2 because these help in understanding the abstract compactness notion in 2.32, and makes it more useful in analysis. Since the course is preceded by 18.034 which deals with the techniques of differential equations without proofs it seems very desirable to go through Exercise 27 in Ch. 5 and Exercise 25, Ch. 7.
