Statistics is a branch of mathematics working with data collection, organization, analysis, interpretation and presentation. In applying statistics to, for example, a scientific, industrial, or social problem, it is conventional to begin with a statistical population or a statistical model process to be studied. Populations can be diverse topics such as "all people living in a country" or ...

To search for a substring of a key in a map you have no choice but to either use a new map on a special kind of key type or to search your map in O(n).std::map uses (by default) operator<() for ordering keys and for searching, and that compare function for std::string is a plain lexicographical compare.. If you create a new map on a special key type that has operator<() compare on basis of a ...
